TO WHOM IT MAY CONCERN

Dear Sir / Madam

We hereby certify that our SHCP 268BQTN Unsaturated Polyester Resin can comply to the US Food and Drug Administration requirements provided that below **POST CURED OF SHCP 268BQTN UNSATURATED POLYESTER RESIN IS PERFORMED:**

3 or 4 hours at 80 to 100 degree C

or

16 hours at 40 degree C

Remarks: Must remember to leave one or two openings and should not create a suction or vacuum situation from inside the tank

However, owing to difficulties in presenting information to all situations, no warranty is expressed or implied and users are recommended to carry out their own tests to determine the applicability of the above information and the suitability of SHCP resin for their particular requirements.

Yours Truly

SINGAPORE HIGHPOLYMER CHEMICAL PRODUCTS PTE LTD
